

**Habitat Management (CSP Enhancements)**  
**Colorado Enhancement Activity Job Sheet H-5**

**February 2005**

**Name:**

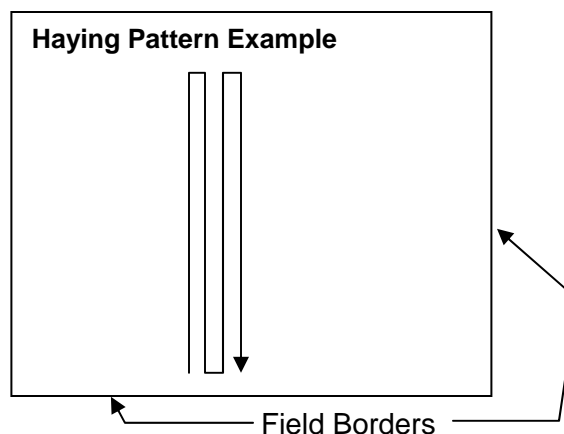

**Conduct Haying Activities to Minimize Wildlife Mortality**

Payment = \$2.00/acre/year for each acre where haying is conducted in a manner that minimizes wildlife mortality. This enhancement is subject to payment caps. Actual payments will depend on CSP Tier level and the number of acres enrolled.

This enhancement will reduce bird mortality caused when mowing and other haying activities start at the outside edge of a field and progress around the edges of the field to the inside, trapping birds in the center of the field where they are killed by the mower. Allowable haying patterns are to: 1) begin on one end of the field and work back and forth across the field or 2) begin in the center of the field and work outward.

**Documentation Required:** Use the following Table for documentation. Attach a plan map showing the field numbers where this enhancement will occur.

Tract & Field Numbers	Acres

**How to Achieve Planned Habitat Conditions:**

---

---

**Certification**

I certify that I am conducting haying activities as described above.
